

Headlight

MAINTENANCE

The complete solution to restoring headlights to as new condition

Headlight

MAINTENANCE

Severely damaged headlight lens

Restored headlight lens

An advanced system that delivers improved headlight performance and clearer vision.

As cars get older, the plastic headlight lenses deteriorate as a result of abrasion and UV exposure. The headlights become a dirty yellow colour with an opaque surface. This surface damage can dramatically reduce the light output and make headlights less effective.

The Invision Headlight Restoration Kit is designed to restore plastic headlight lenses back to as new condition. The kit includes all cleaners, sandpaper, polish and polishing cloths, UV resurface coating and a detailed instruction sheet.

In 5 easy to follow steps, the cars headlights will be clearer and the performance dramatically improved.

Not just for old vehicles

Many relatively new vehicles with headlights that wrap over with a horizontal surface will often show signs of deterioration within a few years. A headlight restoration will dramatically improve the look of these vehicles.

Area prone to damage

DIY Kit (HRK01)

Designed for retail to suit the DIY market. The HRK01 services the headlights of one vehicle.

Restore **1** Car

Trade Kit (HRK02)

Designed for trade workshops. HRK02 can economically restore the headlights of up to ten vehicles.

Restore up to **10** Cars

Kits Contain: Yellow-X Cleaner, UV Clear Coat, graded wet & dry sandpaper, blue cloth and protective glove.
• Masking tape, cleaning cloth and water bottle not supplied.

PROKIT (HRK03) Fast & Professional

PROKIT includes a professional electric sander to dramatically reduce restoration time

Restore up to **50** Cars

PROKIT is a complete workshop solution for high volume headlight restorations.

The PROKIT is designed to service 50 vehicles and all the components come in a solid case that can be easily restocked with all ordering details on the inside lid. The kit is specifically designed with high volume workshops in mind as the included Metabo electric sander dramatically shortens the time it takes to service a vehicle.

The market for vehicles needing restoration is enormous so PROKIT Headlight Restoration is an opportunity to create new income for your business.
